DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 08, 2007 has been entered.

2. Claims 1-3, 5-6, 8-12 and 14-15 are pending and presented for examination for this office action.

Allowable Subject Matter

3. Claims 1-3, 5-6, 8-12 and 14-15 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: 1, 6 and 11 identify distinct features for defining a destination element, wherein the source element comprises a source business object, a source business component and a first source field all pertaining to a first user interface, the destination element comprises a destination business object, a destination business component, and a first destination field all pertaining to a second user interface, the defining the source element and defining the destination element comprises identifying the source business

Art Unit: 2166

object the source business component, the first source field, the destination business object, the destination business component, and the first destination field via a user interface display comprising at least one form applet, mapping the source element to the destination element, wherein the mapping comprises mapping the first source field to the first destination field, and executing the mapping provides an unchanged image of data mapped to the first source field to the first destination field for display on the second user interface, maintains the state of the data and the mapping of the data to the first source field, and maintains the data only in the first location of the structured environment. The closest prior art, Linsay (U.S. Patent No. 6,694,338) disclosing defining source and destination element, fails to suggest the claimed limitation as mentioned above in combination with other claimed elements. The above features in conjunction with all other limitations of the dependent and independent claims 1-3, 5-6, 8-12 and 14-15 are hereby allowed.
